

## **“A Message from the owners of Creekside Pet Boarding”**

**As a designated “essential business” Creekside will remain open! Remember, the CDC, AKC, and veterinarians maintain that there are no reports of pets becoming sick with COVID-19 and it is not known to transfer between animals and humans.**

Creekside Pet Boarding has implemented safer ways to drop off and pick up your pets by maintaining social distancing whenever possible. *We respect your choice to do business as usual and while our procedures are optional*, we must strive to protect our employees and other clients. Please make boarding reservations for your pet online through our website at [www.CreeksidePetBoarding.com](http://www.CreeksidePetBoarding.com) whenever possible. We always confirm by email.

### **Drop offs and Pick Ups**

Upon arrival at our front gate, if you chose to wait in your vehicle an employee with fresh gloves will retrieve your pet and any belongings. At pick up they will deliver them back to your vehicle. You are welcome to get out of your vehicle at your own discretion, but please do not if you feel ill.

If payment is necessary, the employee will give you the option of placing your payment in a sanitized plastic container at your vehicle and the payment will be taken into our office for processing. Credit cards will be sanitized upon return along with your receipt.

### **Super Sanitation**

If you prefer to enter our gates to check in our out, please make use of our ample hand sanitizers and wipes. Be assured that we wipe down surfaces all day and after each client with our regular disinfectant. ***The great news is that our regular disinfectant is a potent virucide that is safe for dogs, cats, humans, and much more protective than anything found in stores.***

### **Check Out the Effectiveness of Our Commercial Disinfectant:**

**Kills: Coronavirus, Polio, Salmonella, Swine Flu, MRSA, HIV Virus, Giardia, Listeria, E. Coli, Leptospira, Hepatitis Virus, Parvovirus, Distemper, Avian Influenza (Bird Flu), Feline Herpesvirus, Feline Calicivirus, Feline Panleukopenia, Canine Parvovirus, Streptococcus, Staphylococcus, and much more!**

Be assured that Creekside Pet Boarding is not in danger of closing and we will use any slow times for facility improvements. Our goal is to keep our staff employed and support our community as we all weather the storms together. As owners, we rely upon our Sheriff's department retirements and do not draw Creekside salaries. Our top priority is to protect our employees. Be safe and cautious and remember just because you might not have playtime doesn't mean your dog doesn't need one.

God Bless America,

*Tom and Laura Means*
